## FUEL work during Covid – 19 Pandemic

During the pandemic, the mode of teaching-learning changed. As FUEL work in the scope of Quality education (SDG-4) for underprivileged youth, we could closely observe the challenges these students facing.

Though In such critical situation FUEL could not stop working for marginalised youth. We worked across India & followed our aim of career guidance, academic coaching & future skill training more than 6000+ needy youth through blended learning platforms & provided academic coaching support to more 450 underprivileged students. When FUEL started implementing blended learning program (Virtual Teaching –Learning), we gauged the problem that students are facing technical challenges also many students could not take the benefit of it due to unavailability of SMART phones, Laptops, data plan. Hence FUEL distributed approximately 100 SMART phones & laptops to these students and recharged their phones with the data plans with support of our corporate partners.

We offered the paid virtual internship & online learning platform on AI/IOT/ Digital marketing & its practical implications, Soft skills training, CV clinics & mock Interviews, Linked In profile reviews & much more for more than 1000 disadvantaged youth to gain the knowledge & real time corporate experience.

500 Employee volunteers from various corporate contributed the valuable time, inputs & insights to these underprivileged students.

In this pandemic since schools visits were not possible, FUEL conducted the Career Olympiad with Virtual Edu-Raksha career Conclave & Future skill summit for them to give them the career direction & counselling through the employee volunteers who were from various industries & sectors.

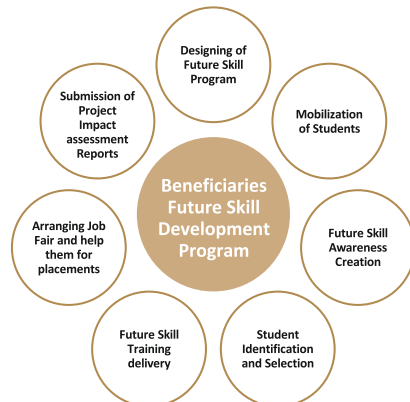

**Thus FUEL believes in continuous work towards excellence & enables students to grab the opportunity to fulfil their dream**
