

At Hindustan Power, being a Responsible Business is a trait that runs in our guiding and operations philosophy, applicable equally in all spheres. Hence for us, Corporate Social Responsibility is the Good Energy that allows socio-economic development of the community and chalks a path for being self-reliant. This mindset has led the company towards being environmentally aware and ethically right, thereby enabling the stakeholder to become part of the development story.

The Good Energy

Mangli Bai and Bahadur Singh in their pre-harvest paddy fields, along with their children from Takhuli village in Anuppur
