BUILDING A NATION **FIT FOR CHILDREN**

World Vision India works to create lasting change in the lives of children, their families and communities living in contexts of poverty and injustice. With almost 60 years of experience of working with children, we bring our grassoots expertise to our Area Development Programmes across the country. To ensure sustainability, our programmes span 15 years, creating communities that ensure the well-being of children.

We also create and implement custom projects, working on issues of children that corporates and foundations seek to address.
